

Michael Lomman

Michael Lomman

Industry Partner

Roy Hill

Mike Lomman has worked extensively in the resources sector, notably mining and is a leading advocate of systems thinking, advanced planning systems, supply chain optimisation, business improvement, innovation, process control, analytics and measurement.

As General Manager Demand Chain at Roy Hill since the beginning of the bankable feasibility study in 2010, he designed and implemented the Remote Operations Centre and Integrated Operating Model incorporating the aforementioned business disciplines.

Current responsibilities include managing the integration and optimisation of outbound production (demand) and inbound (supply) supply chains, including Remote Operations Centre, offsite receipting and distribution centre, site warehousing & logistics, Non-Process Infrastructure and Water Operations.
