NIST Technical Language Processing Community of Interest (TLP-COI) Model Based Enterprise Summit

On April 14 I presented our work at the NIST Technical Language Processing Community of Interest (TLP - COI) Model Based Enterprise Summit. The summit was a fantastic opportunity to present our research to a wide audience of both industry and academics. Approximately 100 attendees were online. I was also on the panel for the Q&A session after my talk and had the opportunity to answer a variety of questions posed by the audience.
