

Mojtaba Heydar presents - Resource planning and optimisation for maintenance scheduling

Optimal planning and scheduling in plant and asset maintenance play an important role in the successful, economical, and reliable operations of the system. Therefore, managing the resources, including time, will be a key factor in delivering optimal and practical schedules.

In this presentation, Mojtaba looks at the well-established maintenance scheduling problem from a different perspective. His objective is to find the optimal resources while maintaining the minimum duration of the schedule at the same time. Mojtaba will present several simple formulations along with real examples.

When **Friday 17 March at 1.30 pm Perth time and 3.30pm Brisbane time**
