

Technical Language Processing

Our collective ideas about the need to tailor NLP for the engineering domain have led us (together with collaborators overseas) to coin a new name for the area, Technical Language Processing. Melinda made a YouTube video explaining TLP as part of a promotion for the ESREL conference. It is available at <https://www.youtube.com/watch?v=lfRUA1jqhcc>

It has been viewed 206 times on YouTube and posts about it have been read by more than 3000 people on LinkedIn.

A TLP workshop was held on the UWA campus on 4th March. It was attended by more than 20 researchers and students from UWA, Curtin and CSIRO. Outputs of the workshop include a list of current and future group projects as well as clarification on individual projects.
