# Themes

Research Themes

The Centre will focus on the three key roles in a new digitally-driven maintenance management system.

Theme 1: Support the Maintainer

Theme 2: Support the Engineer

Theme 3: Support the Manager

Translation Themes

These themes are vital as a mechanism to translate the outputs of the research themes into the workplaces of our Partner Organisations and to enable maintenance data science and technology service providers

Theme 4: Support the Organisation

Theme 5: Generic Software Architecture
