

# Human Side of Data Science Innovation Management

## Curtin University

The Research Bazaar (ResBaz) is a worldwide festival promoting the digital literacy emerging at the center of modern research. In 2022 ResBaz, Dr. Li gave a talk on the Human Side of Data Science Innovation Management. The talk covered people skills, communications, and new ways of working in data science innovations, with a case study of machine learning model application in a mining operation context.

Dr Keyao Li

Research Fellow
