What does the Data Say or Why I don't like analogies?

AJCAI conference Perth - Hyatt Regency Perth, Perth, WA, Australia

Michael Small present the keynote address on the final day of the AJCAI conference.

He covers the data science complications addressed by all the research themes at the Centre focusing on projective failure and transition.

Key messages included

- "Supervised" learning in the absence of truth
- Finding "useful" data
- Finding the right tools
- Keep your model simpler than your data
- Let the data speak - but don't force it to sing
